TECHNICAL SKILLS

- Java, Python
- HTML, CSS, JavaScript
- MySQL, MongoDB
- VS Code, GitHub, Claude, ChatGPT

SOFT SKILLS

- Communication
- Teamwork
- Problem Solving
- Adaptability
- Time Management
- Leadership

INTERESTS

Dance
Fitness Activities

YUVASRI S

Computer Science & Engineering Student

PROFESSIONAL SUMMARY

Dedicated Computer Science Engineering student seeking a technical role to apply academic knowledge and hands-on project experience to real-world software development lifecycle, build scalable applications.

EDUCATION

B.E. Computer Science and Engineering 2023 – 2027

Kongunadu College of Engineering | CGPA: 8.2

HSC (12th Standard)

Sowdambikaa Matriculation Higher Secondary School, Thottiyam | Percentage: 83.5%

SSLC (10th Standard)

Sowdambikaa Matriculation Higher Secondary School, Thottiyam | Percentage: 100%

PROJECTS

- **AI Acoustic Fall Detection** — AI-powered safety system that detects human falls by analyzing real-time sound patterns, using a machine learning algorithm to distinguish fall events from normal activity.
- **AI-Based Deforestation Detection using Satellite Imagery** — Team project analyzing satellite imagery to detect deforestation trends; contributed to presentation design and logic monitoring.
- **Career GPS** — AI-powered career advisor (Python, Streamlit, TF-IDF) that matches users to 15+ career paths, identifies skill gaps, computes a readiness score, and runs "what-if" career simulations.
 - Modular Python backend (matching, gap-analysis, simulation, and scoring services) with a Plotly-powered Streamlit UI; readiness score blends skill coverage (50%), skill importance (25%), depth (15%), and learning consistency (10%).
- **JobScan** — Fraud-detection web app + API (Python, Flask, Logistic Regression) that scores job postings for scam risk, achieving 90% scam recall and a 0.991 ROC-AUC.
 - Trained on the public EMSCAD dataset (17,880 postings); chose Logistic Regression over Random Forest since it caught 90% of scams versus 59%, prioritizing scam recall over raw F1 score.
- **Aura – Women's Health Assistant** — Privacy-first period-tracking app (React, Flask, scikit-learn) with local cycle prediction, mood/symptom analytics, and a rule-based chatbot; no external AI APIs used.
 - Cycle prediction via Linear Regression and pattern grouping via KMeans, run entirely locally on Flask + SQLite; generates downloadable PDF health reports using ReportLab.
- **Workforce Optimization Console** — Internal tool (Flask, SQLAlchemy, TF-IDF + Cosine Similarity) that ranks employees against project requirements across five weighted factors and flags staffing gaps.

- *Combines TF-IDF and cosine similarity for experience-relevance scoring alongside skill match, qualifications, availability, and track record, each a weighted factor in the final match score.*

CERTIFICATIONS & COURSES

- Typewriting (English) Junior Grade certification with distinction
- Value-added courses in Django and Java basics
- Participated in various technical seminars and workshops

AREAS OF INTEREST

- Software Development
- Web Application Development
- Logical Problem Solving

EXTRA-CURRICULAR ACTIVITIES

- Actively participate in college events like annual day
- Involved in presentations and group discussions
- Engage in self-development activities

CO-CURRICULAR ACTIVITIES

- Attending various seminars on emerging topics
- Participating in paper presentation and workshop.
